

ISO 50001 Internal Auditor

Gain the knowledge and skills to plan, conduct and follow up on an ISO 50001 internal audit on our ISO 50001 Internal Auditor training course.

The first day of this interactive course will provide delegates with an introduction to energy management systems (EnMS) and ISO 50001, including an overview of ISO 50001 and its relationship to other standards, plus an introduction to energy performance indicators and how these are monitored. The second day covers the complete EnMS audit process, from audit planning and checklist writing to conducting the audit, questioning techniques, non-conformities and audit report writing. Workshops and exercises will help delegates to practise their new knowledge.

Upon completion of this course students will be equipped with the skills to perform audits to assess the conformance and effectiveness of their EnMS, and contribute towards its continual improvement.

COURSE DURATION

2 days

CPD

Equivalent to 14 hours

COURSE PRICE

CERTIFICATES

All delegates will receive a certificate on completion.

Who should attend?

This training course is suitable for anyone involved in the maintenance of an energy management system (EnMS), and can also be used as a development tool for auditees, giving them insight into the auditing process. Delegates might include:

- anyone required to audit an EnMS to ISO 50001
- managers wishing to gain an insight into the auditing of an EnMS
- auditees needing a better understanding of the audit process

Day one of this course is our [Introduction to ISO 50001 training course](#) so delegates do not need prior knowledge of ISO 50001 to attend.

Key topics

Topics covered on the course include:

- benefits of an EnMS
- the plan/do/check/act (PDCA) cycle and how it is used with an EnMS
- analysis of the clauses and requirements of ISO 50001
- the positive impact of internal EnMS audits on management systems and energy use
- how to plan and audit, including creating an audit checklist
- conducting an audit, including interviewing techniques
- following up on an audit, including closing meetings and nonconformity reporting

Skills gained

Delegates who complete this ISO 50001 Internal Auditor training course will gain the required skills and knowledge to perform internal audits on their organisation's EnMS, including being able to:

- plan, conduct, report and follow up an EnMS audit
- determine the extent to which their own organisation's EnMS meets the requirements of ISO 50001:2018
- identify possible areas for improvement

All delegates who participate fully will receive an ISO 50001 Internal Auditor training certificate following the course.

Course agenda

Our training courses are designed to optimise the learning experience for delegates both in face-to-face settings and in our Virtual Classroom.

Under the guidance of our expert tutors, attendees will follow an agenda which is briefly outlined below:

The tutor put the material across in a very good way, with real life examples, it was definitely not a death by Powerpoint course. This helped keep people focused along with the use of exercises on learnings throughout the course.

Tata Steel UK Ltd

Tutor was able to share a lot of industry insights which were useful compliments to the course material. His experience in both auditing and the training delivery enabled him to best adapt the course materials for us in attendance.

Laing O Rourke

I started the course with absolutely no knowledge of ISO 50001, but after about 90 minutes we had our first group exercise, which demonstrated to me just how much I had already learned in a short period of time. We had several of these group tasks which enabled us to apply our learnings in situations which accurately reflected real audit scenarios.
