

ISO 9001 Implementation

Learn how to establish a quality management system (QMS) within your organisation that meets the requirements of ISO 9001:2015 on this interactive ISO 9001 Implementation training course.

This 2-day training course guides delegates on how to implement an effective ISO 9001 quality management system (QMS) to achieve:

- a process approach to management
- the identification of risks
- a systematic way of evaluating performance
- a customer-focused approach at the heart of the business
- continual improvement using the Plan-Do-Check-Act (PDCA) model
- certification

The course is built around a case study simulation, enabling attendees to benefit from a 'real-world' experience.

CERTIFICATES

All delegates will receive a certificate on completion.

Who should attend?

The ISO 9001 Implementation training course is designed for anyone responsible for implementing an ISO 9001 management system.

It will also benefit managers, department heads and other staff members who wish to support a management system implementation project.

As the course incorporates our [Introduction to ISO 9001:2015](#) training course, no prior knowledge is required.

Key topics

Topics covered on the course include:

- Overview and analysis of the structure and requirements of ISO 9001
- Quality Management Principles and the key components of a QMS
- Implications and benefits of an ISO 9001 QMS
- Developing high-level process maps
- Identifying key interested parties
- Risks and opportunities
- The process for a gap analysis, including exploring methods for effective results
- What is required to plan, implement and review an ISO 9001 QMS
- Support and maintenance of a QMS
- The pathway to successful certification
- The role of Certification Bodies

Skills gained

Delegates attending this ISO 9001 Implementation training course will be able to:

- understand the features and benefits of ISO 9001
- understand the process for a gap analysis and what is required to implement ISO 9001
- support others in applying and integrating ISO 9001 into existing business operations

In-company training

Ideal for groups, you can receive this course exclusively for your organisation at your premises or online in our user-friendly Virtual Classroom.

Enjoy cost-effective flexibility and personalised learning with tailored messaging designed to address your unique business challenges. [Contact us for a quote.](#)

On completion of the course, delegates will be sent a certificate of completion in recognition of their new ISO 9001 Implementation skills.

Course agenda

Our training courses are designed to optimise the learning experience for delegates both in face-to-face settings and in our Virtual Classroom.

The implementation training course begins on day one with our Introduction to ISO 9001:2015 training course, which introduces the fundamentals of ISO 9001:2015. It includes analysis of the key clauses in the standard, giving delegates a working understanding of quality management and ISO 9001. On day two we explain the six phases of developing or converting a management system to be in line with ISO 9001 requirements:

1. conducting a gap analysis as a base-line review
2. identifying issues and interested parties
3. developing policy, objectives and implementation programmes
4. ensuring the integration of the QMS into business operations
5. checking/measuring, audit and review
6. initiating the certification process

Under the guidance of our expert tutors, attendees will follow an agenda which is briefly outlined below:

- Welcome and Introduction
- Module 1 Quality management systems
- Module 2 The organisation in context
- Workshop 1 Issues and interested parties
- Module 3 Scope of the management system
- Module 4 The quality management system and its processes

- Workshop 2 High-level process map
- Module 5 Leadership
- Module 6 Planning
- Workshop 3 Risks and opportunities
- Module 7 Support
- Module 8 Operation
- Modules 9-10 Performance evaluation and improvement
- Workshop 4 ISO 9001:2015 requirements
- Module 11 Documented systems
- Module 12 Implementation and certification
- Module 13 The Plan Do Check Act Improvement Cycle
- Workshop 1 Case Study: Context
- Workshop 2 Case Study: Leadership
- Workshop 3 Case Study: Planning
- Workshop 4 Case Study: Support
- Workshop 5 Case Study: Operation
- Workshop 6 Case Study: Performance Evaluation
- Workshop 7 Case Study: Improvement

My overall understanding of the working parts and how to apply has improved and I now feel confident in applying what I have learnt.

South Western Railway

I have been tasked to draft a QMS for my business and the workshops throughout the course have set me on the correct path and hopefully lead to full accreditation of ISO 9001:2015.

MOD

Tutor was very knowledgeable and able to explain difficult concepts to a wide variety of attendees with very different industry experiences. I felt fully supported throughout the delivery of the course.

J McCann & Co Nottingham Ltd

The tutor, apart from just delivering the content of the course, was evidently a very experienced auditor and was able to provide clarification and examples drawn from that experience, which aided understanding.

PRV Engineering Limited
