

Integrated Management Systems Overview

Understand the synergies between ISO 9001, ISO 14001, ISO 45001 and the benefits of integrating your management systems with our Integrated Management Systems Overview training course.

On this 1-day interactive course, delegates will learn about the features of process-based management systems in general, with a focus on the related elements and key requirements of ISO 9001, ISO 14001 and ISO 45001. They will explore how organisations can identify common approaches to these requirements to create an integrated system. And further workshops will cover topics such as quality, environmental and health & safety management controls.

Students will leave the course with a basic understanding of these core management system standards, and of the value of combining and streamlining their approach to management systems.

COURSE DURATION

1 day

CPD

Equivalent to 7 hours

CERTIFICATES

All delegates will receive a certificate on completion.

Who should attend?

This course is suitable for:

- quality, environmental and health & safety managers tasked with developing an integrated management system
- managers wanting to develop a business management system who need to understand the benefits and potential pitfalls
- senior managers and those needing to support continual improvement opportunities
- anyone looking for a general awareness of management system standards
- those needing to satisfy the knowledge requirements in order to attend the 2-day Integrated Management Systems Auditor training course

Key topics

Topics covered on the course include:

- features of integrated management systems (IMS) based on business processes
- common requirements of management system standards
- key requirements of ISO 9001, ISO 14001 and ISO 45001
- process controls for QMS, EMS & OH&S management systems
- an integrated approach to developing a management system

Skills gained

By the end of this Integrated Management Systems Overview training course delegates will be able to:

- assess the benefits of an integrated approach to management systems
- demonstrate knowledge of the structure and requirements of ISO 9001, ISO 14001 and ISO 45001
- appreciate the synergies between these management system standards

Delegates may follow up completion of this course by attending our Integrated Management Systems Auditor training course, which will give those involved in managing and/or auditing integrated management systems the knowledge and skills to audit an IMS effectively.

A certificate of completion will be awarded to delegates who attend the whole course, signifying their new understanding of IMS.

Course agenda

Our training courses are designed to optimise the learning experience for delegates both in face-to-face settings and in our Virtual Classroom.

Guided by our skilled instructors, participants will adhere to an agenda that closely resembles the following:

- Welcome and Introductions

The tutor had a vast array of knowledge on the ISO information and, through gaining information on our job types, he was able to provide fantastic examples. The virtual meeting rooms for the team were also a great idea as this allowed us to complete activities and learn from each other too.

McCabe McGinn Construction Ltd

The tutor provided real world scenarios to the course content that allowed me to view the material with a different mindset.

Vivergo Fuels

The tutor was informative, understanding of our needs and professional in every way. Couldn't have asked for more. 10/10.
