Introduction to ISO 27001

Understand the requirements and principles of ISO/IEC 27001:2022, the latest international standard for information security management systems (ISMS), on this 1-day practical Introduction to ISO 27001 training course.

Through interactive workshops and presentations led by highly experienced tutors, delegates will develop their understanding of ISO 27001, including its scope, structure and requirements. They will explore key topics, including the determination of risks and vulnerabilities to an ISMS, Annex SL, and the benefits and considerations of certification, with the aim of maintaining or achieving ISO 27001 compliance.

Delegates will leave the course with an understanding of what is needed for an effective ISMS, and all students completing the course will be provided with a certificate.

Who should attend?

This course is suitable for:

- those seeking to gain knowledge of information security management systems (ISMS) and an understanding of ISO 27001:2022 requirements
- anyone responsible for managing information security within an organisation
- those who wish to assess if they should obtain certification to ISO 27001
- senior managers involved in the outcome of ISMS system audits
- those who are new to auditing and ISO 27001 and would like to develop a foundation of knowledge prior to undertaking internal auditor and/or lead auditor training

The training course meets the prior knowledge requirements for the ISO 27001 Internal Auditor and CQI and IRCA certified ISO 27001 Lead Auditor training courses. When booked with either of these training courses a discount of £100 will be applied.

Key topics

Topics covered on the course include:
