

## Lean Basics

Discover how Lean improvement can help your organisation increase customer value, be more efficient and become more competitive, on this Lean Basics training course.

This 1-day introductory course explores the meaning of Lean and its benefits and barriers, as well as the steps and tools that support practical implementation of the Lean approach. The course includes interactive workshops to enable delegates to put their new knowledge into practice.

Upon completion of the course, delegates will have an understanding of the core principles and value of a Lean organisation. They will also have the skills to decide upon, manage and support Lean transformation.

### COURSE DURATION

1 day

### CPD

Equivalent to 7 hours

### COURSE PRICE

From £675 + VAT

### DATES & VENUES

[View dates & venues](#)

### CERTIFICATES

All delegates will receive a certificate on completion.

## Who should attend?

This course is recommended as an introduction for companies and individuals who are new to Lean and are considering utilising the approach. It will particularly benefit:

- those in organisations considering applying the Lean enterprise approach
- those responsible for supporting and/or monitoring the success of Lean improvement or business improvement projects of all types
- those who wish to pursue the approach, but who have no knowledge of the theory or practice
- those new to Lean who wish to gain an understanding of the Lean concepts prior to attending further training

For a more in-depth understanding of Lean, we recommend viewing our [Lean Practitioner training course](#).

## Key topics

Topics covered on the course include:

- why Lean?
  - origins of Lean
  - the Lean enterprise approach and its value
  - understanding advantages and constraints
- the Lean approach and toolkit
  - 5 Lean principles
  - The 7 +1 wastes
  - value stream mapping
  - the 5S
- managing Lean implementation
  - culture and mindset
  - relationship to quality management and Six Sigma
  - Lean projects – roles and responsibilities

## Skills gained

By the end of this course, students will be able to:

- understand the nature and practical implementation of the Lean enterprise approach and toolkit
- appreciate corporate Lean enterprise application, roles and responsibilities
- evaluate the case for Lean application in a specific organisation, with its potential benefits and barriers
- understand the Lean implementation steps and tools

Delegates will receive a Certificate of Completion following the training in recognition of their understanding of Lean principles and commitment to continuing professional development.

## Course agenda

Our training courses are designed to optimise the learning experience for delegates both in face-to-face settings and in our Virtual Classroom.

  - Lean principles
  - 8 wastes
  - 5S
  - Process and value stream mapping
- Lean transformation
  - Culture and mindset
  - Change management and implementation needs
  - Organisation and Lean Projects
- Review & Close

## In-company training

Ideal for groups, you can receive this course exclusively for your organisation at your premises or online in our user-friendly Virtual Classroom.

Enjoy cost-effective flexibility and personalised learning with tailored messaging designed to address your unique business challenges. [Contact us for a quote.](#)

The course was interesting and quite insightful, we were all looking at ways how we could then apply this to our organisation and role. It made me especially, think about what we can do better as a business to ensure its highest success.

#### A1 Comms Ltd

The tutor provided a good mixture of factual and practical learning, whilst interacting with anecdotes which lightened the learning process.

#### Inflight Engineering Services Ltd

The tutor was very knowledgeable and explained everything thoroughly, which helped me take in as much as possible as I am new to the subject of Lean.

#### Chem Resist Group Ltd
