

Understanding ISO 22301 Business Continuity

Find out why and how to maintain business continuity in the face of unexpected disruption by implementing a management system based on ISO 22301.

Business interruptions can happen at any time and often without warning. These can range from extreme weather conditions preventing staff from arriving at work, through industrial action, sudden loss of key suppliers, to IT failures and beyond.

ISO 22301:2019 is designed to help businesses prepare, protect and respond to these business interruptions.

The standard is applicable to businesses of any size and sector, and implementing ISO 22301 demonstrates to stakeholders that a business is prepared for the unexpected and that its business continuity plans are fit for purpose.

This 1-day Understanding ISO 22301 training course will provide delegates with an overview of business continuity management and the requirements of the standard.

COURSE DURATION

1 day

CPD

Equivalent to 7 hours

CERTIFICATES

All delegates will receive a certificate on completion.

Who should attend?

The course is suitable for anyone who has little or no knowledge of business continuity management or ISO 22301, including:

- those seeking to implement ISO 22301 who need to understand the requirements of this international standard
- auditors, business continuity and risk management personnel
- quality, environmental, H&S, and information security personnel wishing to extend their knowledge to business continuity management

Key topics

Topics covered on the course include:

- ISO 22301 requirements and clauses
- benefits of effective business continuity management
- Plan-Do-Check-Act (PDCA) cycle
- business continuity management lifecycle
- risk assessment
- resource requirements
- business impact analysis
- business continuity plans
- recovering from a significant business interruption
- Annex SL, the high-level management system structure that ISO 22301 is based upon
- BCMS continual improvement
- ISO 22301 certification process

Skills gained

On completion delegates will:

- be able to discuss the benefits of having a robust business continuity capability
- understand the requirements of ISO 22301
- understand what a business continuity plan might look like
- have an appreciation of the steps required to implement a business continuity management system
- be able to contribute to improved effectiveness of an existing business continuity management system
- contribute to the development of a new business continuity management system

All delegates who attend the full day will receive a certificate of completion.

Set a solid understanding on the way forward to gaining ISO 22301.

Dovecote Park Ltd

Very practical approach to all of the subject; very good trainer with an engaging and inclusive manner. Everyone seems to have valued it. This course will be very helpful both in gaining ISO certification and in improving our BC management system.

Polyco Healthline

The tutor was able to clearly outline best practice and I could see easily areas of improvement within my organisation. I didn't think this would be quite so clear to me whilst doing the course which was positive.
